1. INTRODUCTION

1.1 Purpose

The Software Requirement Specifications will:

- ❖ Define the scope of business objectives, business functions, and organizational units covered,
 - ❖ Identify the business processes that the solution must facilitate,
 - ❖ Facilitate a common understanding of what the functional requirements are for all parties involved,
 - ❖ Establish a basis for defining the acceptance tests for the solution to confirm that what is delivered meets requirements.
- The purpose of the document is to collect and analyze all assorted ideas that have come up to define the system, its requirements with respect to consumers. Also, we shall predict and sort out how we hope this product will be used in order to gain a better understanding of the project, outline concepts that may be developed later, and document ideas that are being considered, but may be discarded as the product develops.

1.2 Glossary and Abbreviations

Acronym	Reference
SRS	System Requirement Specification
UC	Use Case
BRL	Business Rules
CBR	Common Business Rules
ET	Email Template
N/A	Not Applicable or Not Available
MSG	Message
[Field]	Convention for mentioning a field
<<Field>>	Convention for value of this field, specifically use in the context of Email Template
"Text Value"	Convention for mentioning a value
<Value>	Convention for mentioning special value, i.e. <Today>, <Current User>
TBU	To be Updated
NRF	National Research Foundation
OOE	Other Operating Expenditure
N/A	Not Available

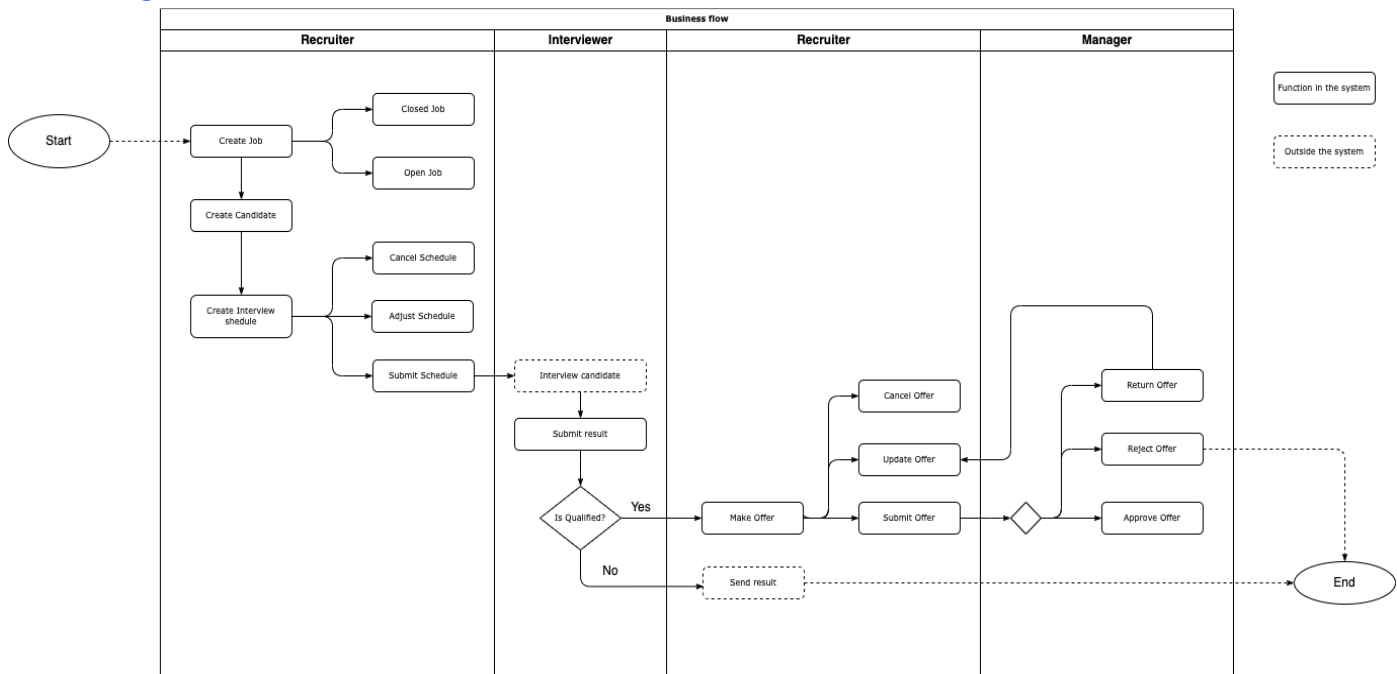

1.3 Document Referenced

Attachment	Document Name / Title
	High Level Requirement Slide
	High Level Wireframes

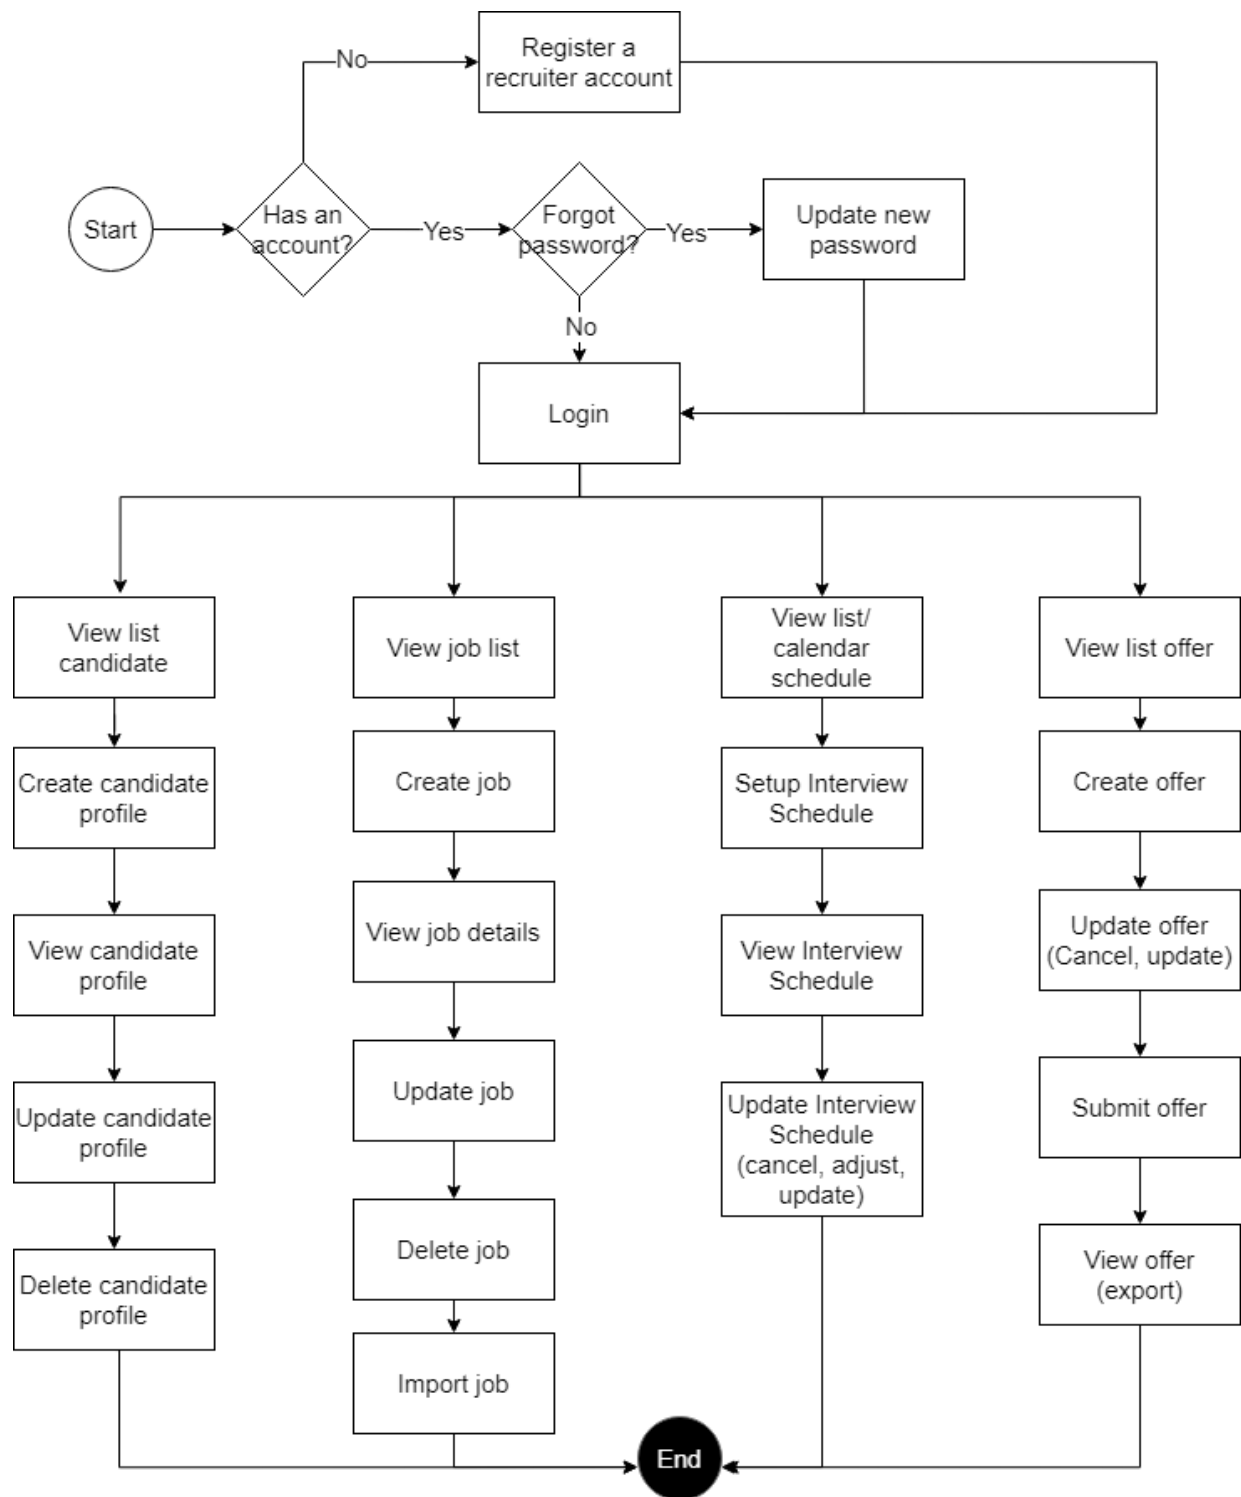

2. HIGH LEVEL REQUIREMENTS

This section describes the general overview of the system functions or business processes which are depicted in different diagrams. It shows the types of users, their granted permissions to perform specific system functions and the sequence required to complete a business workflow (if any). As the section name implies, it is high-level which means not detailed enough. For detailed requirement specification, please see Use Case Specifications section below.

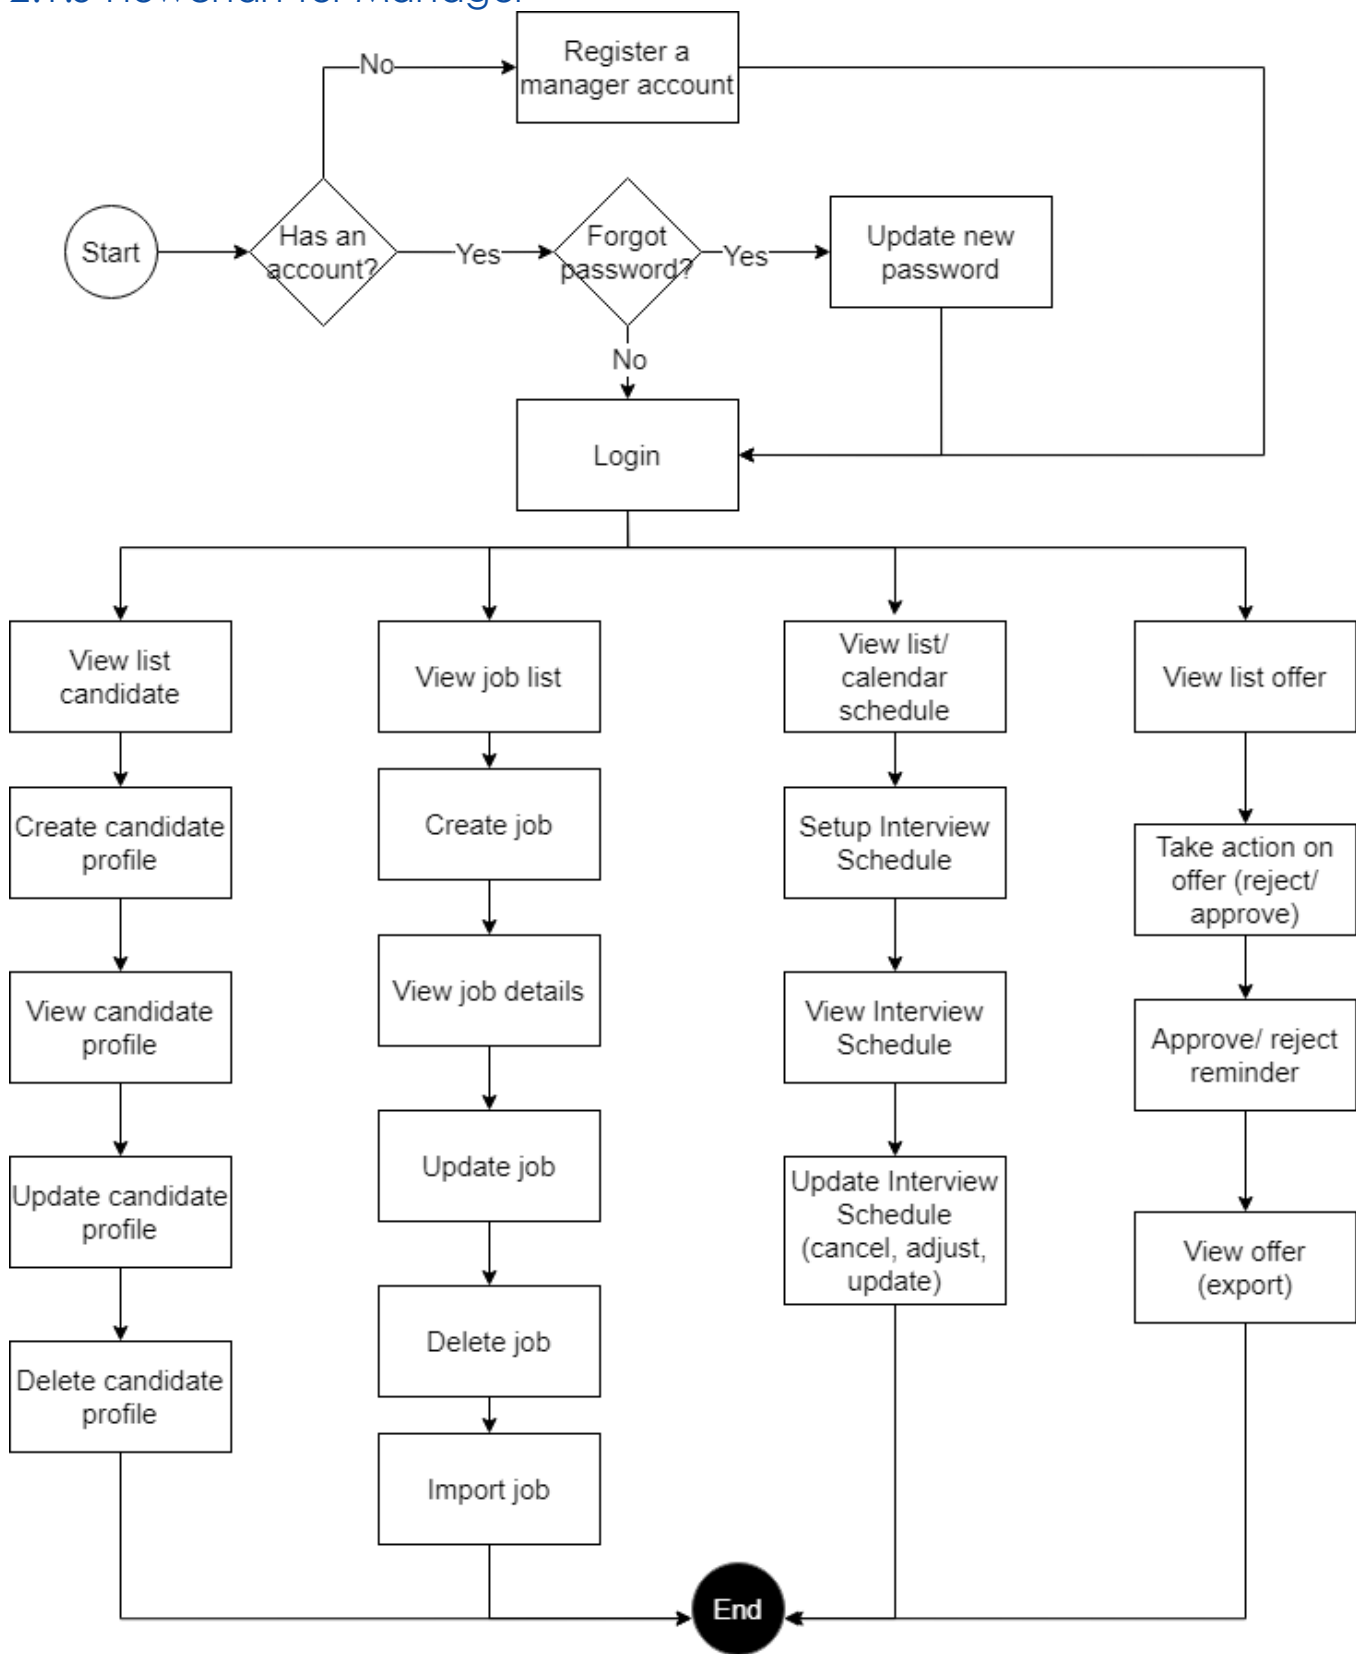

2.1.1 High Level Business ProcessGeneral Flowchart

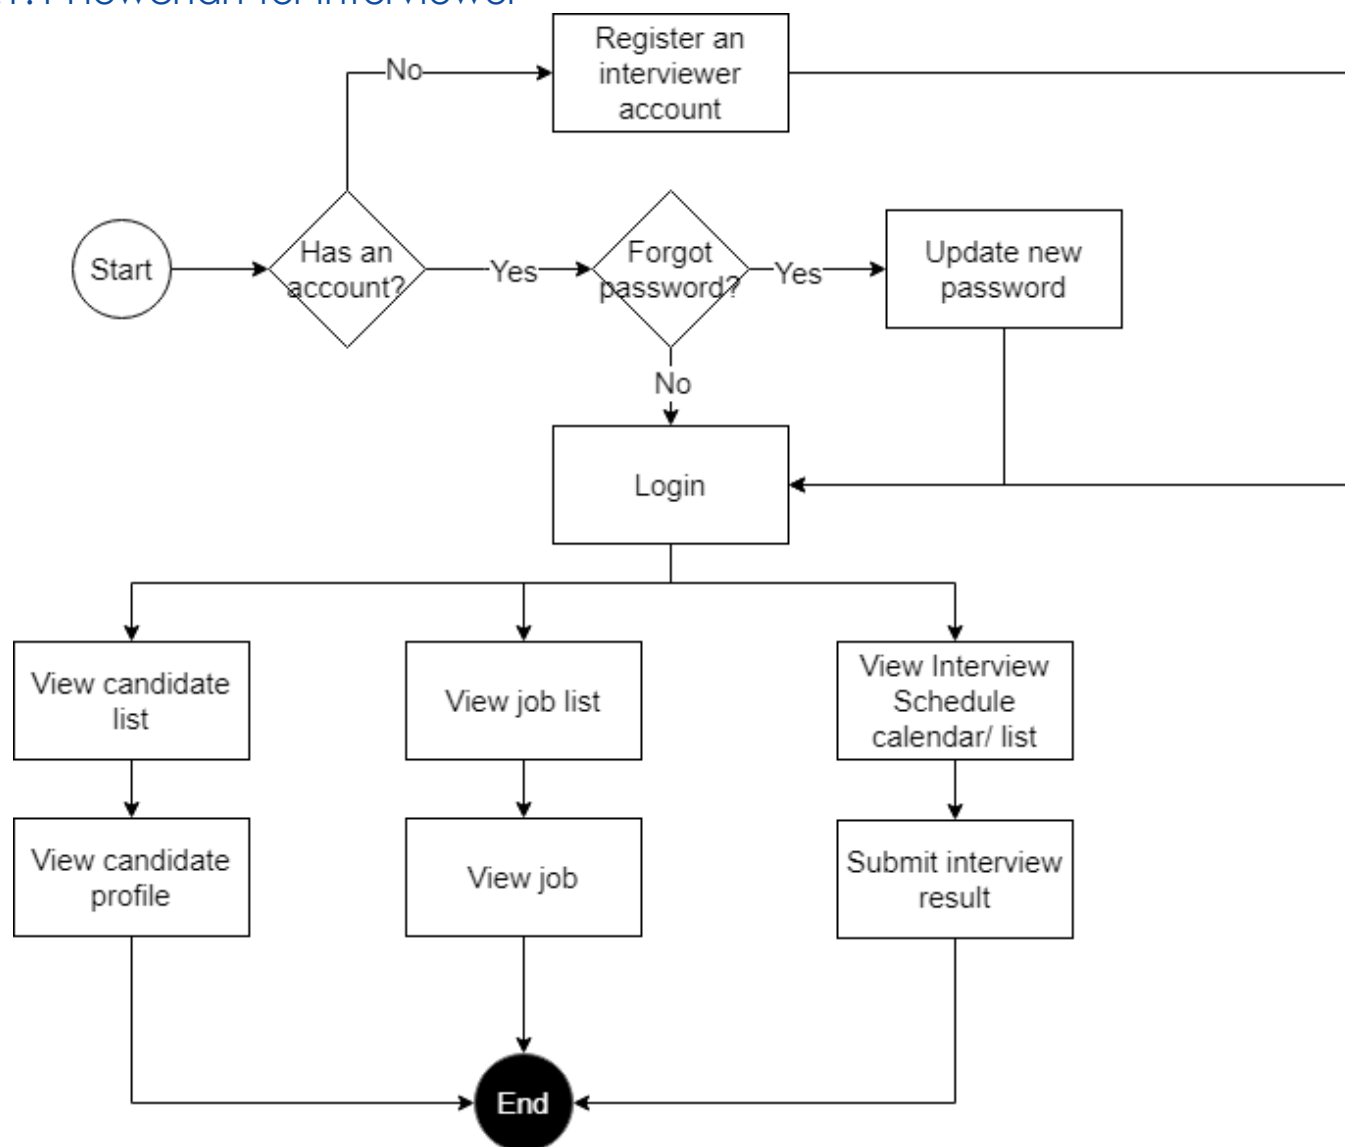

2.1.2 Flowchart for Recruiter

2.1.3 Flowchart for Manager

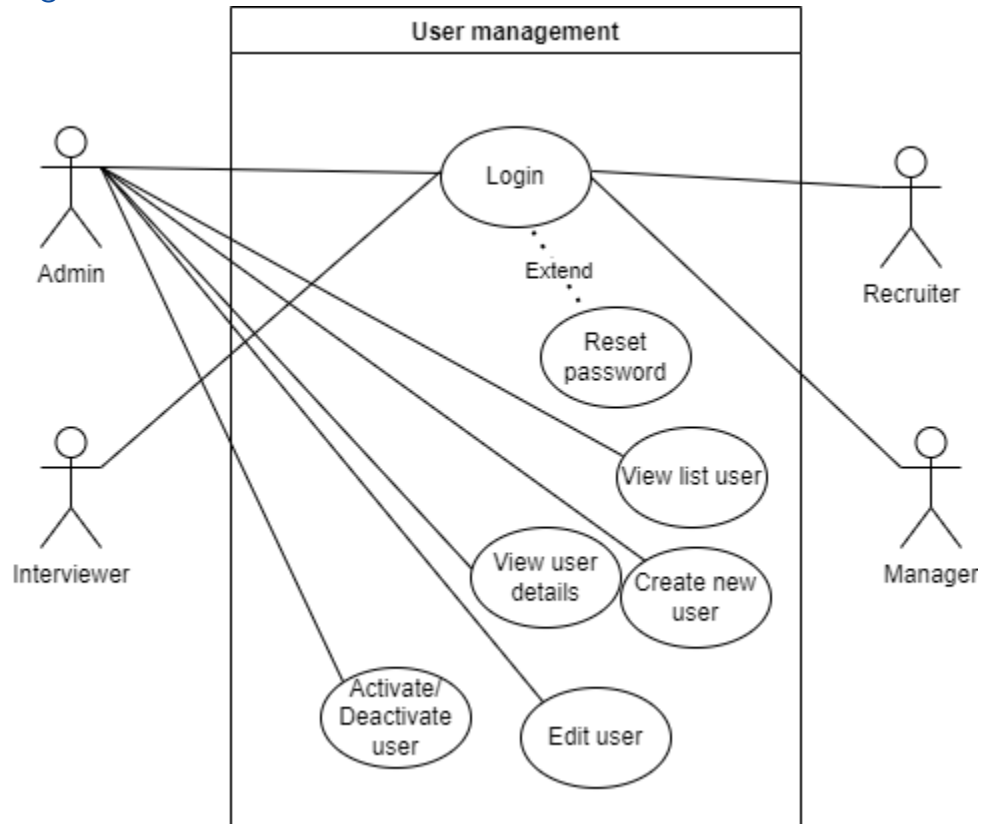

2.1.4 Flowchart for interviewer

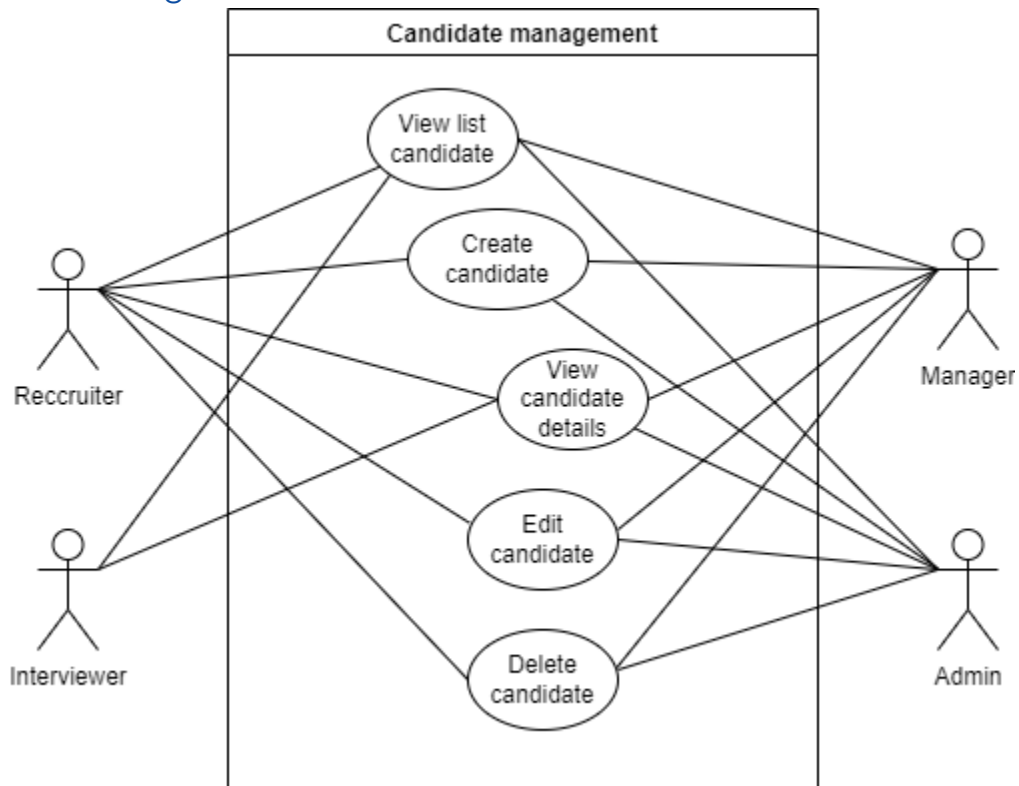

2.2 Use Case Diagram

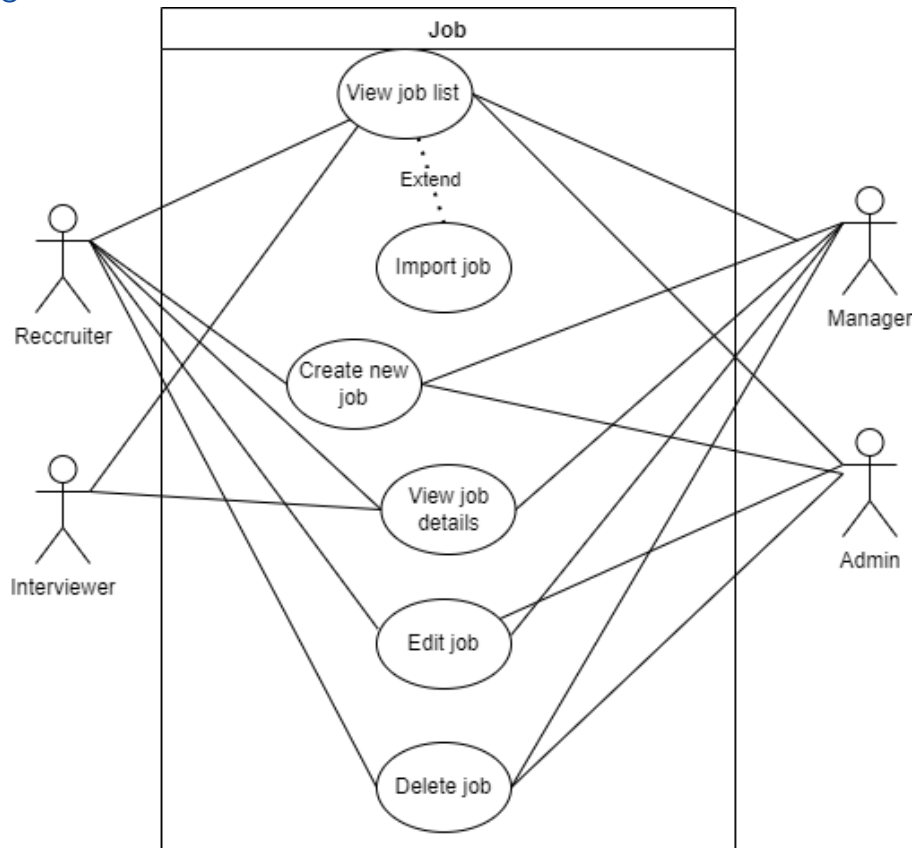

2.2.1 User management

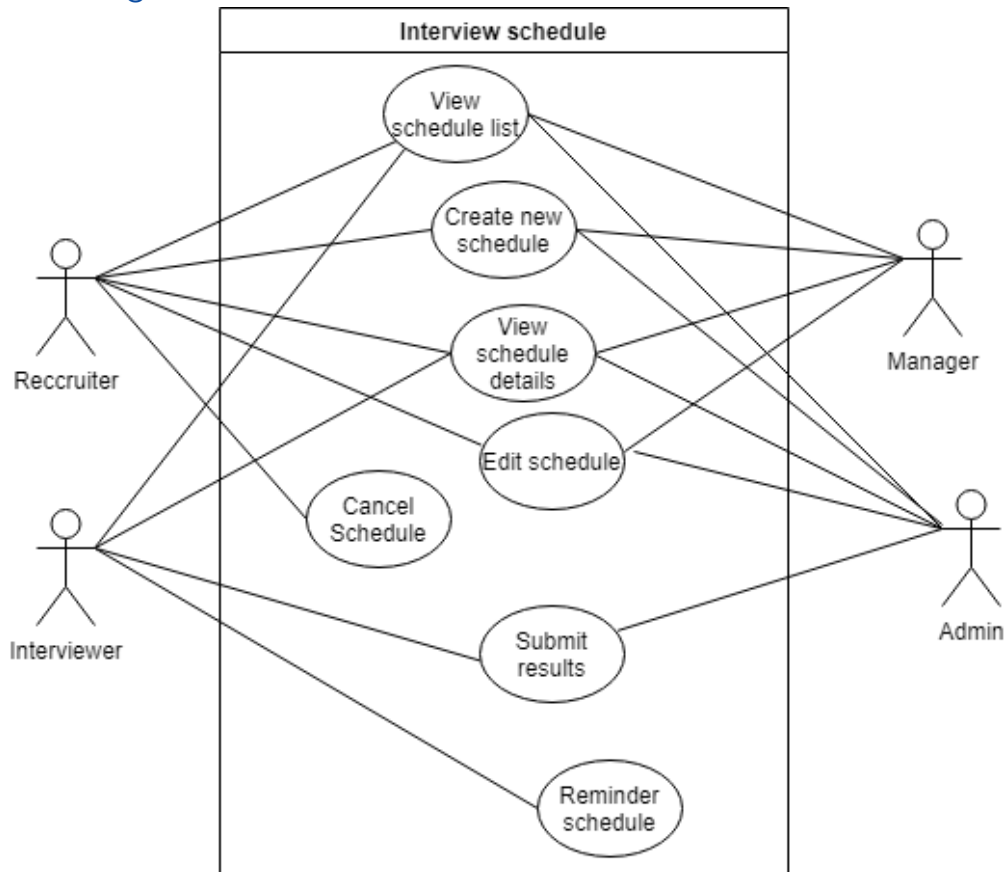

2.2.2 Candidate management

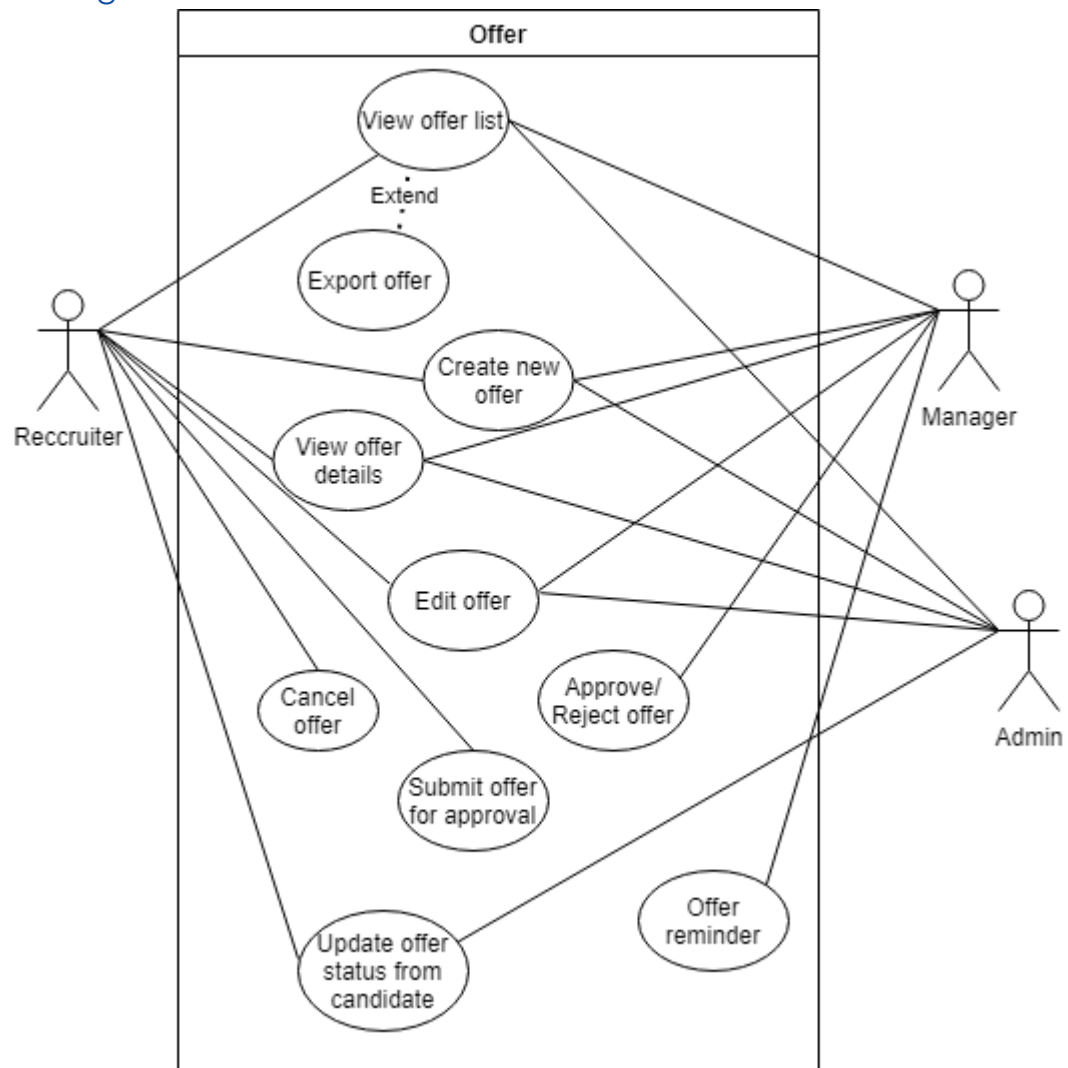

2.2.3 Job management

2.2.4 Interview management

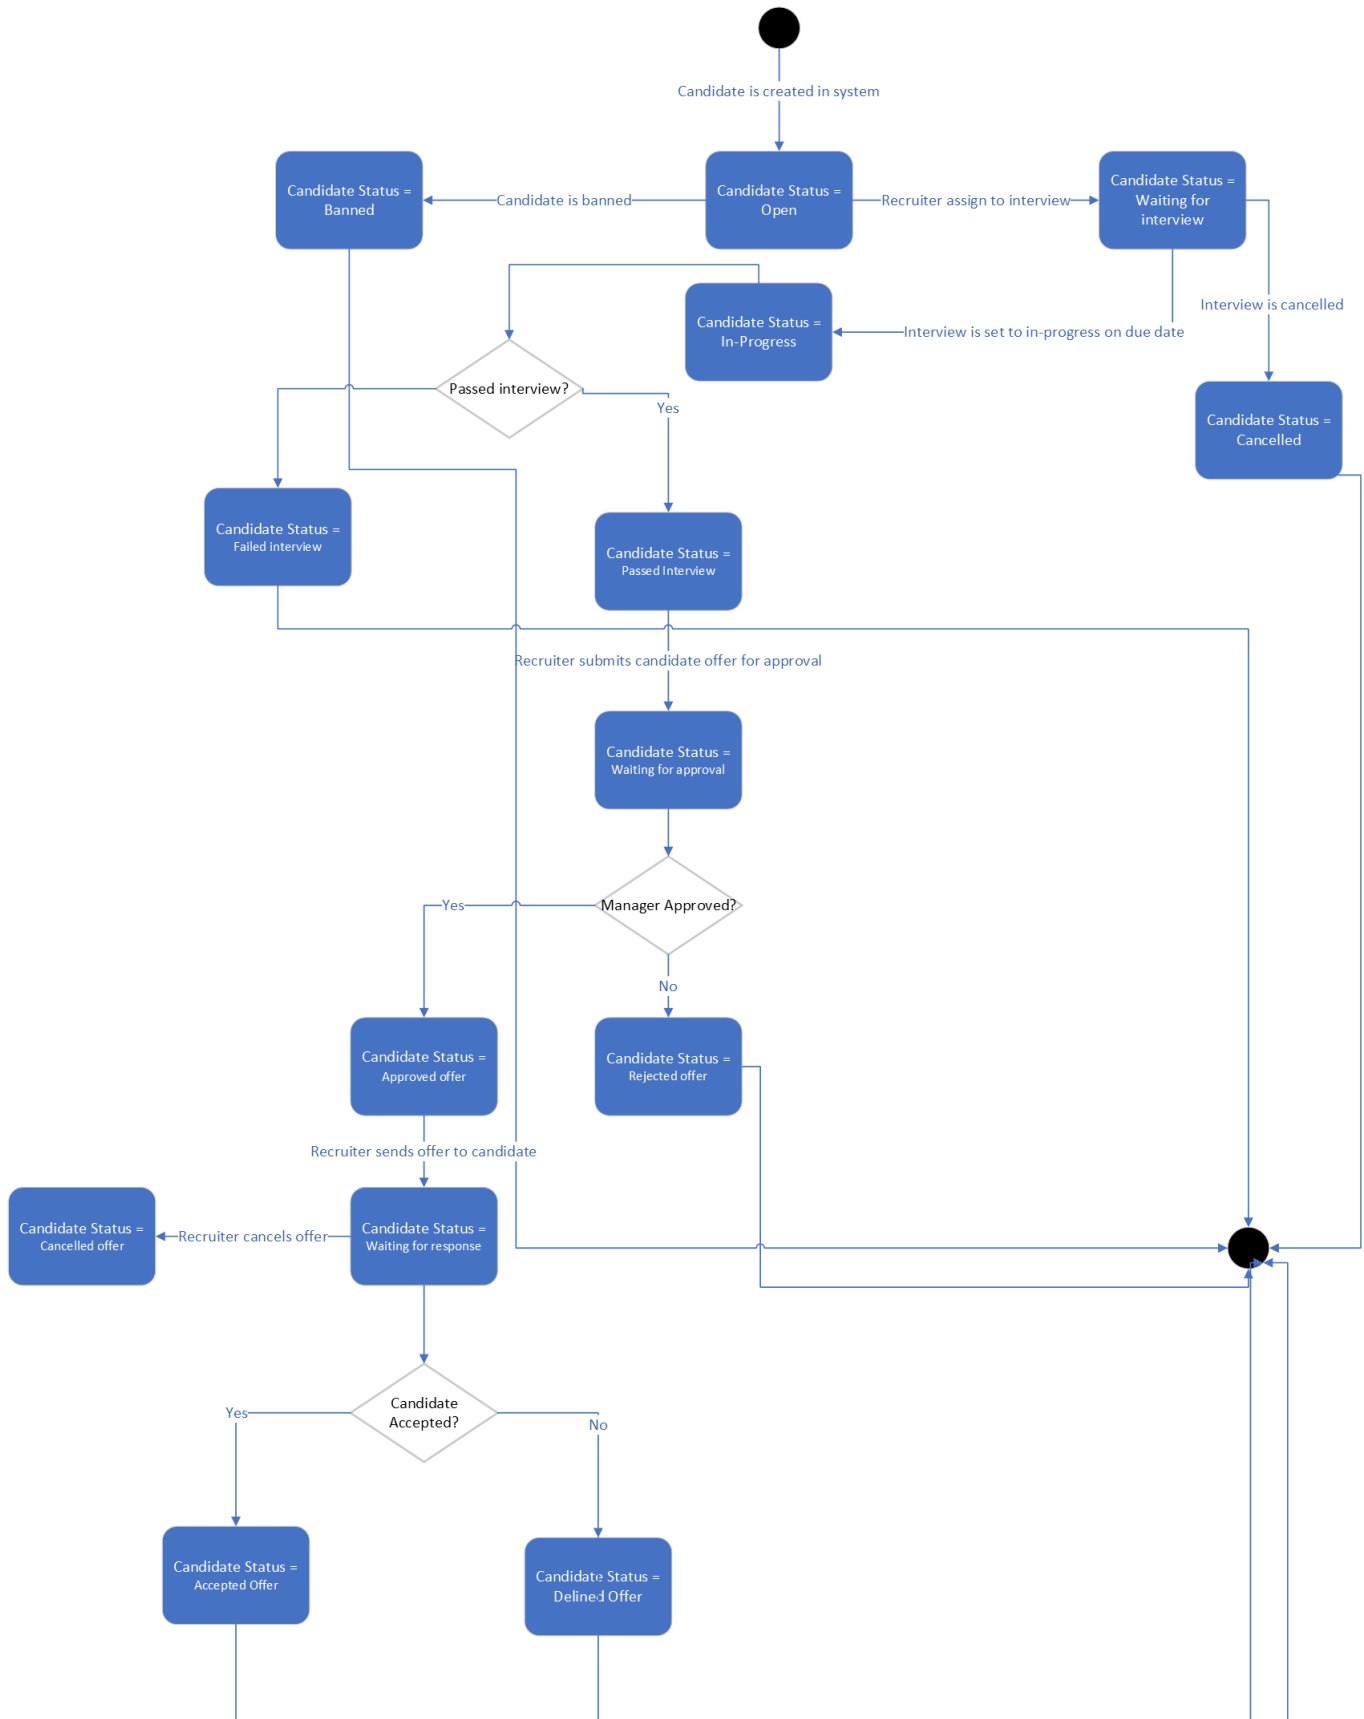

2.2.5 Offer management

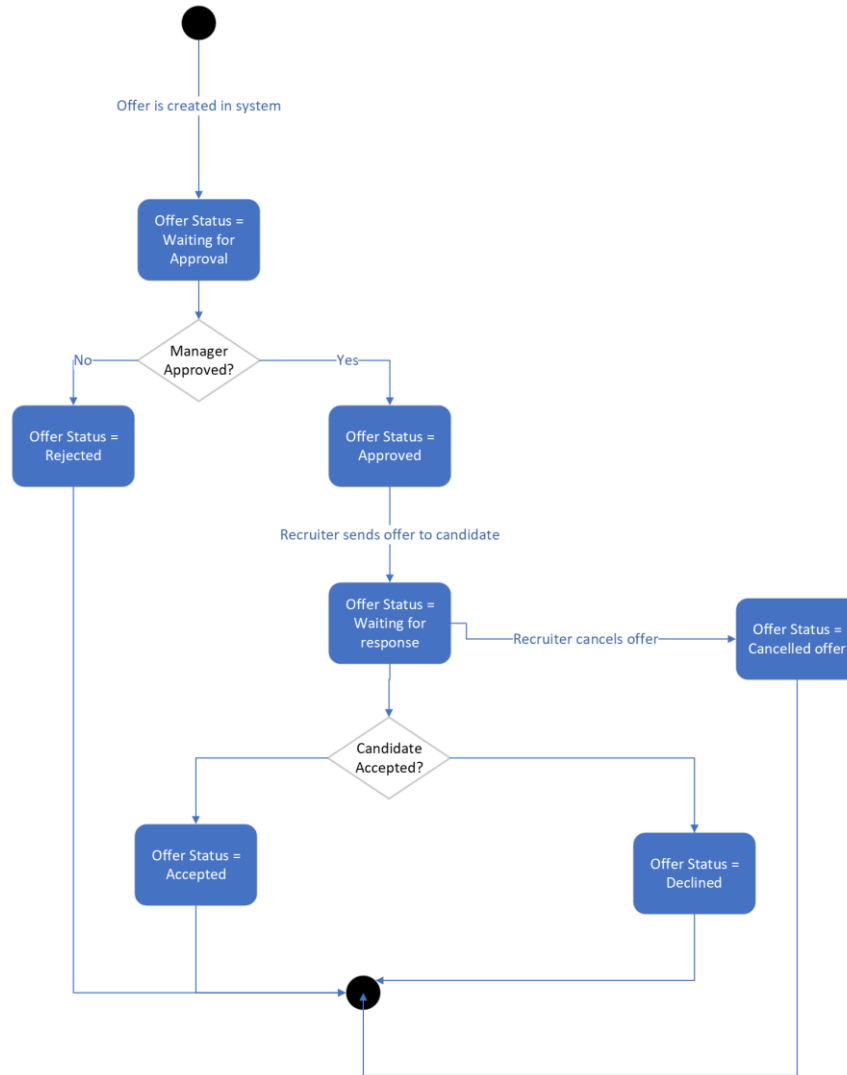

2.3 State diagram

2.3.1 Candidate status

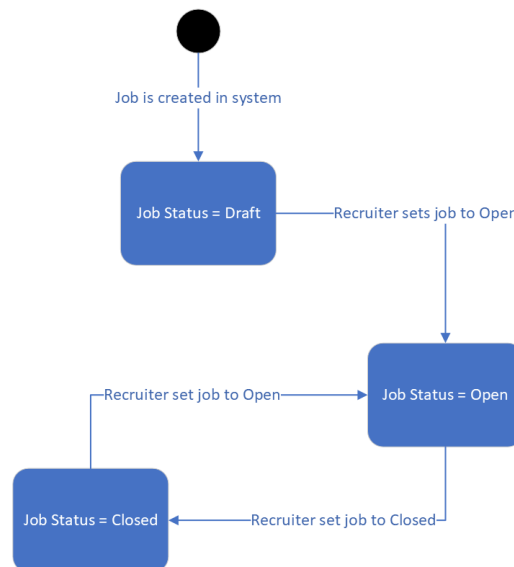

2.3.2 Interview Status

2.3.3 Offer Status

2.3.4 Job Status

2.4 Actor

Actors	Description
Recruiter	User who is in charge of managing the candidate, interview schedule and offer
Manager	User who is in charge of approve/reject the offer. Can also acts as a recruiter with all of recruiter's permissions
Interviewer	User who has the permission to view interview schedule and submit interview results
Admin	User who is in charge of user management. Can also acts as Recruiter and Manager with all of the permissions.

2.5 Use Case Catalogue

UC ID	UC Name	Description
UC01	Login	This use case allows users to log in.
UC02	Logout	This use case allows users to log out.
UC03	Forgot password	This use case allows users to reset password
UC04	Navigation bar	This use case allows recruiter, interviewer, manager and admin to view and select options on navigation bar
Candidate management		
UC05	View Candidate list	This use case allow user to view candidate list in the system
UC06	Create Candidate information	This use case allows user to create a candidate profile in the system
UC07	View Candidate information	This use case allows user to view a candidate profile detail in the system
UC08	Edit Candidate information	This use case allows user to edit a candidate profile in the system
UC09	Delete Candidate information	This use case allows user to delete a candidate profile in the system
UC10	Ban candidate	This use case allows user to ban a candidate in the system
Job management		
UC11	View job list	This use case allows user to view job list in the system
UC12	Create Job	This use case allows user to create a job in the system
UC13	View job details	This use case allows user to view a job in the system
UC14	Edit job	This use case allows user to update a job in the system
UC15	Delete job	This use case allows user to delete a job in the system
Interview management		
UC16	View interview schedule	This use case allows user to view an interview schedule
UC17	Create interview schedule	This use case allows user to setup an interview schedule
UC18	View interview schedule details	This use case allows user to view an interview schedule
UC19	Submit interview result	This use case allows interviewer to submit result interview
UC20	Edit interview	This use case allows user to update an interview schedule
UC21	Cancel interview	This use case allow user to cancel the interview schedule
UC22	Reminder for upcoming interview	This use case allows user to receive the Interview reminder notification from the system
Offer management		
UC23	View offer list	This use case allows user to view offer list in the system
UC24	Create new offer	This use case allows user to create an offer in the system
UC25	Edit offer	This use case allows user to edit offer in the system
UC26	View offer details	This use case allows user to view offer details in the system
UC27	Approve/ Reject offer	This use case allows user to approve/ reject offer in the system
UC28	Update offer status from Candidate	This use case allow user to update offer status on behalf of the Candidate after the offer is sent to the candidate
UC29	Cancel Offer	This use case allow user to cancel an offer
UC30	Reminder to take action on offer	This use case allow user to receive the Offer reminder notification from the system

UC31	Export Offer	This use case allows user to export the list of offers from the system
User management		
UC32	View user list	This use case allows admin to view list of users
UC33	Create new user	This use case allows admin to create new user
UC34	View user details	This use case allows admin to view user's information
UC35	Edit user	This use case allows admin to edit user's information
UC36	Activate/Deactivate user	This use case allows admin to activate/ de-activate user

3. USE CASE SPECIFICATIONS

This section covers the system's functional requirements which details what the system must do in terms of input, behavior and the expected output. It elicits the interaction between the actor(s) and the system, the system's behavior and the results of their interactions.

3.1 UC01: Log in

3.1.1 Overview

ID and Name	Log in
Description	This use case allows users to log in.
Actor	Recruiter, manager, Admin and interviewer
Trigger	Users click on the Log in button
Pre-condition	Users have valid account in the system
Post-condition	Users can logged into the system

3.1.2 Flow of Events

3.1.2.1 Basic Flow

Step	Description
1	Users access the system
2	The system displays the Log in screen
3	Users fill in the provided account information and click the Log in button
4	The system validates the account credentials successfully and allows the user to access the system
5	Users log in successfully
6	The flow ends

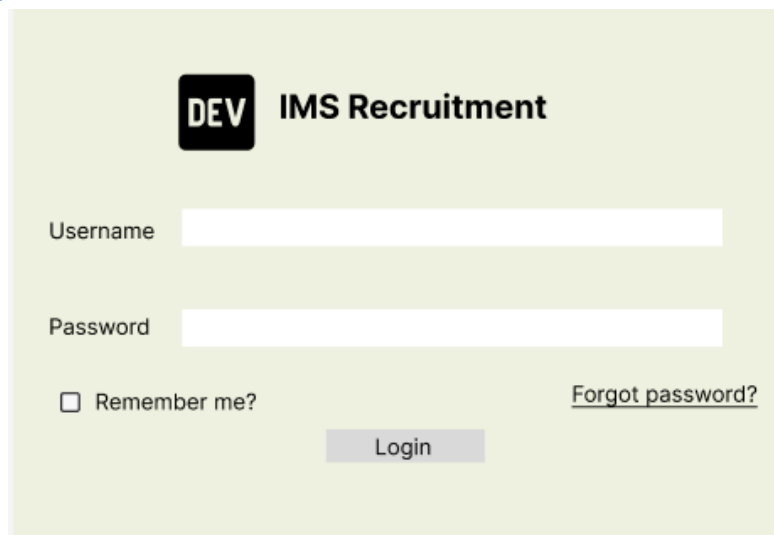

3.1.2.2 Exception flow - Librarian, User fill incorrect password and/or ID

Step	Description
1	The system fails to validate the credentials and return an error message ME001: "Invalid username/ password. Please try again"

3.1.2.3 Alternative flow - User forgot password

Step	Description
1.	User chooses Forgot password
2.	The System trigger UC03

3.1.3 Mock-up Screen

Pic.01 - Login screen

3.1.4 Screen Description

3.1.4.1 Login Screen

REF	Field Name	Control Type	Data Type	Description
-----	------------	--------------	-----------	-------------

1	User name	Text box	Text	Input User Name. Mandatory. Default to blank.
2	Password	Password	Text	Input password of user. Mandatory. Default to blank.
3	Remember me	Check box	NA	User check the box to save login information Optional. Default to uncheck
4	Forgot password	Hypertext	NA	Click when user forgot Password
5	Log In	Button	NA	Action to log in
6	Logo	Image	N/A	Display IMS logo
6	IMS recruitment	Label	N/A	Display system name

3.1.5 Business Rules

Business Rule ID	Business Rule Description
BRL-01-01	Must have User name and Password if not, show ME002: "Required field"
BRL-01-02	If user enter wrong username/password, system shows ME001: "Invalid username/ password. Please try again"

3.2 UC02: Log out

3.2.1 Overview.

ID and Name	Log out
Description	This use case allows users to log out
Actor	Recruiter, manager, Admin and interviewer
Trigger	Users click on the Log out
Pre-condition	Users have already logged in
Post-condition	Users can log out of the system

3.2.2 Flow of Events

3.2.2.1 Basic Flow

Step	Description
1	Logged-in users click on Logout link on header
2	The system displays the confirmation dialog: "Are you sure you want to log out?"
3	Users click OK to confirm
4	User is logged out of the system
5	System display Login screen.
6	The flow ends

3.2.2.2 Exception flow 1 - User cancel when log out

Step	Description
1	At step 3, users click Cancel to discard the flow
1. 2	System closes the dialog and no changes are made

3.2.3 Mock-up Screen

Log Out

Are you sure you want to log out?

Cancel
OK

Screen 2. Log out dialog

3.2.4 Screen Description

3.2.4.1 Header / Log out link

REF	Field Name	Control Type	Data Type	Description
1.	Log out link	Text link	Text	Click to log out of the system

3.3 UC03 Forgot password

3.3.1 Overview.

ID and Name	Forgot password
Description	This use case allows users to reset password

Actor	Recruiter, Manager, Interviewer, Admin
Trigger	User clicks on “Forgot password” link on login screen
Pre-condition	User forget his/her password to access to system
Post-condition	User is backed to login screen

3.3.2 Flow of Events

3.3.2.1 Basic Flow

Step	Description
1.	From Log in screen, users click Forgot password
2.	The system displays the Forgot password screen
3.	Users enter email address and click Send
4.	The system validate that email address exists in the system and send an email with a reset password links to user (Email template EM04) System displays success message ME003: “We've sent an email with the link to reset your password.”
5.	Users click in the link in the email
6.	The system displays a screen for user to reset password
7.	Users enter new password and confirm password
8.	The system update the new password for users
9.	User can use the new password to login
10.	The flow ends

3.3.2.2 Exceptional Flow 1 – Users cancel the Forgot password flow

Step	Description
1.	At step 3, user doesn't enter email address and click Cancel
2.	The system direct back to Login screen
3.	The flow ends

3.3.2.3 Exceptional Flow 2 – The reset password link has expired or has been used

Step	Description
1.	At step 5, the link in the email address has expired or has been used
2.	The system displays an error message ME004 “This link has expired. Please go back to Homepage and try again.” to inform user
3.	The flow ends

1.1.1.1 Exceptional Flow 3 – The email address user enters doesn't exist in the system

Step	Description
1.	At step 3, the system validates that email address doesn't exist in the system
2.	System display error message ME005: “The email address doesn't exist. Please try again.”
3.	The flow ends

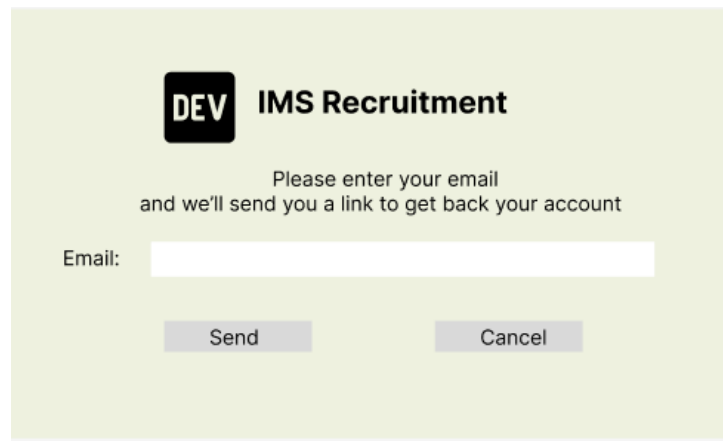

1.1.1.2 Exceptional Flow 4 – New password and confirm password doesn't match

Step	Description
1.	At step 7, new password and confirm password don't match
2.	The system displays an error message ME006: “Password and Confirm password don't match. Please try again.” to inform user

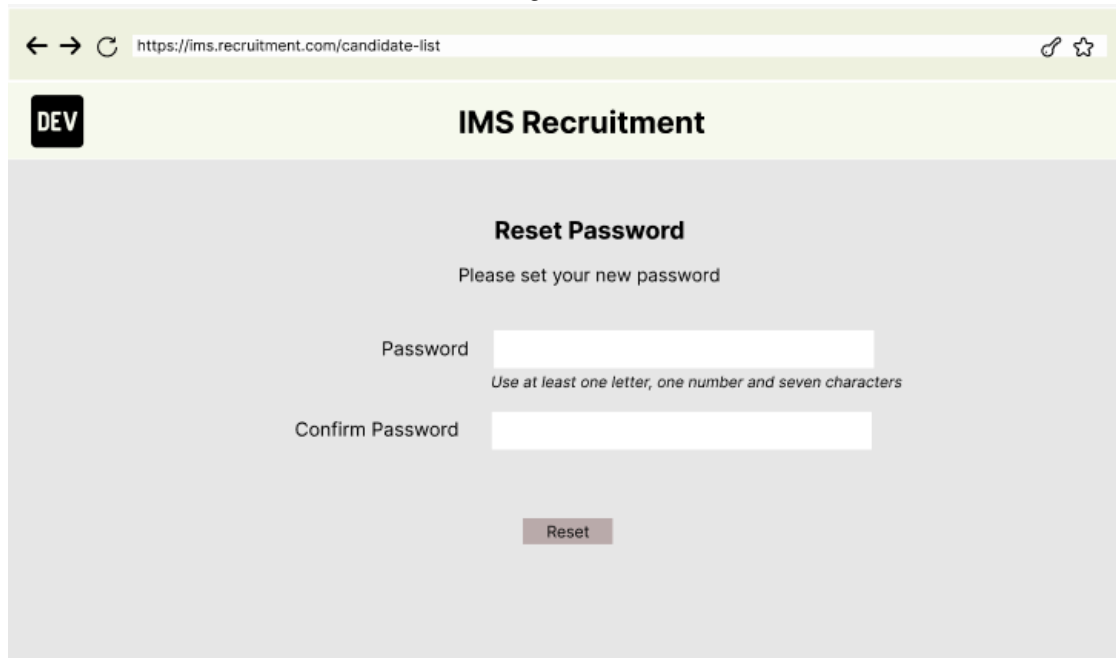

1.1.1.3 Exceptional Flow 5 – New password or confirm password doesn't meet the password requirement

Step	Description
1.	At step 7, new password or confirm password doesn't meet password requirement.
2.	The system displays an error message ME007: “Password must contain at least one number, one numeral, and seven characters.” to inform user
3.	The flow ends

3.3.3 Mock-up Screen

Pic.02.1 - Forgot password screen

Pic 2.2: Reset password screen

3.3.4 Screen Description

3.3.4.1 Forgot Password / Step 1: Enter email dialog

REF	Field Name	Control Type	Data Type	Description
1.	Dialog's title	Label	N/A	Display "Forgot password"
2.	Instruction	Label	Text	Display "Please enter your email and we'll send you a link to get back your account."
3.	Email address	Text field	All characters	Mandatory. Default to blank. Allow to enter user's email address Must be email address format
4.	Send	Button	N/A	Click to submit the email address
5.	Cancel	Button	N/A	Click to close dialog

3.3.4.2 Reset Password screen / Step: Enter password

REF	Field Name	Control Type	Data Type	Description
1.	Password	Text field	All characters	Mandatory. Default to blank. Allow to enter password. Password will be masked when user types
2.	Instruction	Label	Text	Display "Use at least one letter, one number and seven characters."

3.	Confirm password	Text field	All characters	Mandatory. Default to blank. Allow to enter confirm password. Password will be masked when user types
4.	Reset	Button	N/A	Click to reset the password

3.3.5 Business Rules

Business Rule ID	Business Rule Description
BRL-03-01	User must input email correctly
BRL-03-02	The reset password link can only be used 1 time. Afterwards it will be invalid
BRL-03-03	The reset password link is only valid for 24 hours. Afterwards it will expire
BRL-03-04	System only send reset password email to valid email address that already tied to an existing and active account in the system.
BRL-03-05	Password needs to be encrypted. Password needs to have at least one letter, one number and seven characters.

3.4 UC04: Navigation bar

3.4.1 Overview

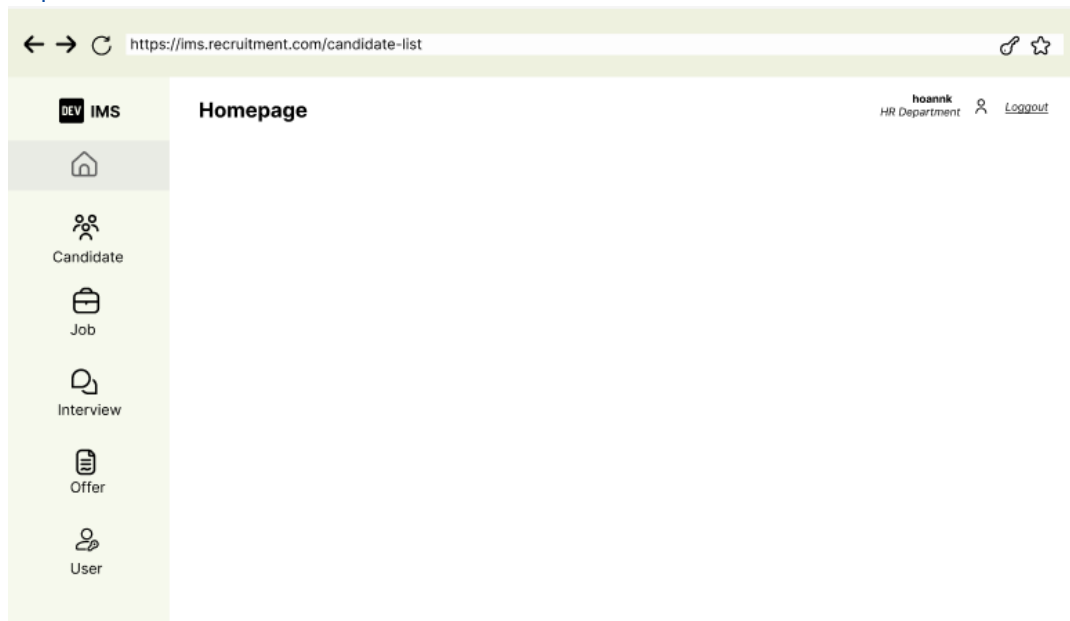

ID and Name	Navigation bar
Description	This use case allows recruiter, interviewer, manager and admin to view and select options on navigation bar
Actor	Recruiter, Manager, Interviewer, Admin
Trigger	User clicks on any menu on the navigation bar
Pre-condition	User logs in to the system successfully
Post-condition	User can open

3.3.2 Flow of events

3.4.1.1 Basic Flow

Step	Description
1.	User clicks on options on navigation bar
2.	System displays the

3.4.2 Mock-up Screen

Pic-03: Homepage screen

3.4.3 Screen Description

3.28.3 Mock-up Screen

The screenshot shows a web application interface for managing offers. The top navigation bar includes a back arrow, a forward arrow, a refresh icon, and the URL <https://ims.recruitment.com/candidate-list>. On the right, there is a user profile for 'hoannk' in the 'HR Department' and a 'Logout' link. A left sidebar contains icons for DEV, Home, Users, Calendar, Messages, Documents, and Profile. The main content area is titled 'Offer' and shows the 'Offer details' for a candidate named 'Nguyễn Quanh Anh'. The offer details are organized into two columns. The left column lists: Candidate (Nguyễn Quanh Anh), Position (Developer), Approver (Nguyễn Hòa), Interview Info (Interview SBA, Interviewer: ThuyNT, HaNN2, AnhLM1), Contract Period (From 12/02/2022 To 12/02/2023), Interview Notes (Candidate is fully-match with 5 years experience in IT industry), and Status (Approved). The right column lists: Contract Type (Full-time), Level (Senior), Department (IT), Recruiter Owner (Dainv), Due Date (25/12/2021), Basic Salary (25.000.000 VND), and Note (N/A). At the top right of the offer details, there are two buttons: 'Mark as Sent to Candidate' (blue) and 'Cancel Offer' (red). At the bottom center, there is a 'Cancel' button. A note at the top right of the offer details states 'Created on 22/02/2022, last updated by anhlm1 today'.

Pic.27.1 – The picture shows offer details for user to Mark offer as sent to Candidate

The screenshot shows the same web application interface as Pic.27.1, but with different action buttons. The offer details for 'Nguyễn Quanh Anh' are the same. The buttons at the top right are now 'Accepted Offer' (blue), 'Declined Offer' (orange), and 'Cancel Offer' (red). The 'Status' field now shows 'Waiting for Response'. The 'Cancel' button remains at the bottom center. The note at the top right of the offer details remains the same: 'Created on 22/02/2022, last updated by anhlm1 today'.

Pic.27.2 – The picture shows offer details for user to mark offer as Accepted or Declined by Candidate

3.28.4 Screen Description

REF	Field Name	Control Type	Data Type	Description

4. NON-FUNCTIONAL REQUIREMENT

4.1 Performance

No.	Type of Transaction	Response Time
1	Login, Logout - From submission of request to the completion of the response.	Will not exceed 2 seconds for 95% of the time.
2	Query transaction to get data	Will not exceed 2 seconds for 95% of the time.
3	Update transaction to update data	Will not exceed 2 seconds for 95% of the time.
4	Report generation	Will not exceed 2 seconds for 95% of the time.

4.2 System Availability

The system service available hours are as follows

1. Production: 24 hours (including Sundays and public holidays);
2. Development, SIT, User Acceptance Testing (UAT) and training: Monday - Friday (0800-1800 hours, after 1800 hours upon request);

Vendor will work out a process to inform the company immediately of any downtime and take the necessary action to resume the services immediately.

Vendor will send weekly and monthly report on the system's availability and performance

4.3 Audit Logging and monitoring

Any events that hold a security risk will be recorded in the system logs and audit trails. The following events will be recorded:

1. All successful and unsuccessful login attempts;
2. All successful and failed access to personally identifiable data;
3. All successful and failed access to sensitive/restricted data;
4. Changes to all records;
5. Changes to all system configurations;
6. Security events generated by operating systems;
7. Security events generated by security devices (such as firewalls, IPSes, WAF, anti-malware, etc.).

4.4 Security

1. Vendor will be responsible to protect all data and make sure that it is not used for other purposes
2. All members from the Vendor that involve in the system will need to sign a confidentiality agreement to prevent any unauthorized disclosures of restricted information
3. Vendor will need to ensure that during data migration, no data is copied to any media, including hard drives, flash drives, or other electronic device, unless expressly approved in advance.
4. Vendor will make sure that restricted data sent over the network is in an encrypted format. When restricted data are backed up to backup media, it will also be in an encrypted format to protect their confidentiality
